KENNER SIMMENTAL RANCH

Welcome...

Roger, Jeanette & Erika Kenner
5606 57th St NE ▪ Leeds, North Dakota 58346
Phone 701-466-2800 ▪ Erika 406-581-1188 ▪ erika.kenner@gmail.com
Herdsman: Bryan Leapaldt ▪ 701-466-2553 ▪ 701-739-8764 Cell

Our first sale at the ranch last year was a success and we thank all who made it to Leeds for the inaugural event and supported us in the sale. The sale was our best ever and we couldn't have asked for more. With a new location and doing everything ourselves, there was a lot more stress last year! We are looking forward to it being a little easier this year now that we have one under our belt!

The sale will be the same format as last year – selling by video only. The animals all stay in their original pens during the entire sale so people can look again if needed.

EPD Rankings and ADG

We organized the catalog in sire groups again this year within each category. We also added the percentile rankings for the EPDs for anything 50% of the breed or better. The EPDs are the best tool to truly evaluate the genetic potential, as they allow one to compare the genetic merit across herds. The actual data only indicates how they rate within their own herd, but the EPDs compare them across the entire breed. This year, we did not push our bulls as much while developing, as we want to develop them for longevity. We are not backgrounding or finishing steers, we are developing bulls for breeding, so we do not want to burn them out. Please pay attention to the ADG EPD more than the ADG within herd. Last year was our first year on a TMR and we started on a 52-megaCal ration. We strive to raise easy fleshing cattle and felt that was a little more than we needed. We went to a 48-megaCal ration this year.

Efficiency

It's been hard to see the prices of cattle drop, but it was inevitable. What goes up, must come down! Since we saw it rise right before Christmas, hopefully, it will hold it's own in 2016. With reduced prices, we need to make sure we are more efficient with everything. Now, more than ever, is when you need to make sure the genetics you choose will make you more efficient. For everyone, that may mean different things.

We are confident we have something for you. When you look at the EPDs of our cattle and how they rank in the breed, we are strongest in growth traits and ADG. That right there, will make you efficient if you background. There are also several that excel for calving ease for those who want to concentrate on total live calves born, which is always important, but especially in tighter years. We have been working on our carcass traits as well, as we want your buyers to be successful and want to buy your calves again.

One thing we know will help efficiency is crossbreeding. Make sure to take advantage of the free lunch in heterosis, whether you use a continental on your British based cow herd or use a SimAngus on your crossbreds. It all works.

Feel free to come to the farm ahead of the sale and look at the bulls and heifers. We are looking forward to seeing everyone again and helping you buy the animals that will help you be more efficient & profitable for the future!

Erika, Jeanette, Roger & Brett Kenner

ANNOUNCEMENTS:

Announcements made sale day, and from the auction block during the sale, take precedence over printed material associated with this sale.

Anyone attending this sale attends at their own risk. Breeders or any of the sale staff will not be held responsible for any personal injury while attending this sale.

AIRPORT:

Devils Lake Regional Airport (DVL) is served by United to Denver and has excellent facilities for light aircraft.

Leeds (D31), Maddock (6D3) and Rugby (KRUG) have airports for light aircraft. Check runway conditions before landing

EPDS:

EPDs in this catalog are the Spring 2016 EPDs for all animals.

HERD HEALTH & DATA TEAM:

Herd Veterinarian, Dr. Judy Gibbens, Gibbens Vet Service, Cando, ND
Pregnancy Ultrasound, Dr. JJ Hovde, High Plains Vet Service, Sydney, MT
Carcass Ultrasound, Jason McLennan, Inc., St. Onge, SD

COVER: Cousins - Osker Black and Addisyn Pikop checked out the 2015 bulls over Easter. Photo by Vanessa Pikop, Dalton, MN.

PERFORMANCE DATA:

Complete ultrasound data will be available before the sale by logging on to www.kennersimmental.com. Carcass EPDs in the catalog are already updated with the carcass ultrasound information. Data will also be available on sale day.

VIDEOS:

Videos of the bulls will be available on our website at the end of January. Log on to www.kennersimmental.com.

SALE FORMAT:

The cattle will sell by video on sale day. All the bulls and heifers will be penned next to the sale barn by 10 am on sale day and will stay in those pens throughout the sale.

TRUCKING:

We will try to deliver the bulls to the buyer's farm, or we will assist buyers in coordinating loads and make the most economical trucking arrangements possible. All the bred heifers must be picked up on sale day or have trucking arrangements made soon after since they will be close to calving. For assistance with trucking arrangements, contact Erika.

INSURANCE:

We can keep the bulls at home for no charge until April 1, but we recommend purchasing insurance.

For more information contact: Erika Kenner, 406-581-1188

TERMS & CONDITIONS:

- We guarantee all bulls to be breeders and we reserve the right to test any bull in question as a non-breeder for at least 180 days before making an adjustment. And, if the bull is declared a sound breeder by a competent veterinarian, he will be returned to the buyer, at buyer's expense. In case an adjustment is required, it will be made with a replacement of equal value to animal in question, credit on purchase of another animal, or return of purchase price.
- Each animal becomes property and therefore is also the risk of the purchaser after it is sold. We guarantee the cattle to be healthy sale day.
- For those who cannot attend the sale, we will honor a telephone order and guarantee your phone purchase to meet your request when inspected personally by you.
- Certificates of registry will be supplied by the seller.
- All cattle sell under terms and conditions of the American Simmental Association and will be available in the office on sale day by request.
- We reserve the right to collect 100 units of semen on any bull in the sale for in-herd use only. The collection would be at our expense and buyer's convenience. Each bull will sell to the buyer with 100% ownership opportunity.

Can't make it? Watch and bid online through DV Auction. Log on to www.dvauction.com and register for the sale. *You must be approved prior to the sale, so please register early.*

KENNER SIMMENTAL RANCH

Understanding the Data

WHY USE EPDS?

We have included all the data we can for each animal in this catalog, but we strongly recommend using the EPDs the most. EPDs allow a buyer to compare the animals across the breed. If you look at the actual data of an animal, it only tells you how they compare in that particular herd. By using the EPDs, you can compare them across herds and within herds more accurately.

This year, we've reformatted our lot boxes to include the percentile ranking for each trait of each animal if they rank over 50% of the breed. This will make it easier to evaluate each animal.

CALVING EASE EPD

Please understand the CE EPD is actually **heifer** calving ease. This number tells you how those bulls will calve on heifers - % unassisted compared to the other bulls on heifers. For example: If Bull A has a CE EPD of 10 and Bull B has a CE EPD of 5, Bull A will have 5% more unassisted births than Bull B when used on heifers. If you are going to use the bull for cows, you do not need to have that number as high.

GENOMIC EPDS

Now there are two genomic tests available – a low-density test (30K SNPs) and a high-density test (150K SNPs). The HD test is required for AI sires and donor cows but the LD test is used for most everything else. Both tests include a parental verification and increase the accuracy of the EPDs without a progeny test.

We have tested several bulls in this offering. The top-end bulls were tested with the HD test and all the embryo calves were tested with the LD test in order to give them more accurate EPDs. Normally all embryo calves have the same exact EPDs until they have progeny reported to them as they are just pedigree estimates at first.

All the bulls that were tested are indicated in the bullet points and their EPDs are updated with the DNA incorporated.

DILUTION GENE (DL)

There is a DNA test now for the dilution gene. We have tested all the red bulls or their dams and granddams and have them all identified in this catalog. The results will show as **DLF (Dilution Free)** or **DLC (Dilution Carrier)**.

All of the bulls in the sale offering are DLF and you will see that listed in the data of each lot. Many of the heifers are identified and we are expecting to receive results on a few more before sale day.

DLF means they do not carry the dilution gene so when mated to a black animal, you will not get a grey calf. DLC means they do carry the dilution gene and when mated to a black animal, you may see a grey calf.

ADG EPD

Last year, we added the ADG EPD in our catalog and had calculated it on our own. American Simmental always was calculating this EPD, but not printing it on the pedigrees. Within the last year, the ASA Board voted to print this EPD on every pedigree, so we are including it in this catalog again, but it was calculated by ASA. It is an EPD that is beneficial to cattle feeders and is used frequently by many feedyards.

We also list the ADG of each calf from their 113-day test, however the ADG EPD factors in all the data that goes into calculating the WW and YW EPDs and the gains and compares them across the breed, making it more accurate. There is only a handful of our sale offering this year not in the top 50% of the breed for ADG EPD.

HERD HEALTH

All the bulls in the sale have had calthood vaccinations of Inforce 3 & Endovac at birth. Spring shots were Endovac booster, 7-way Somnus, and Virashield 6. Pre-weaning shots were Endovac, 7-way Somnus and Virashield 6. At weaning they were boosted with Bovishield Gold and somnus and given Decotmax injectable. They were poured with generic Ivermectin on November 5.

The bred heifers were vaccinated and boosted prior to breeding with Vira Shield 6 VL5 HB. They were vaccinated with Scour Bos 9 and Type A Clostridia and were boosted with Scour Bos 4, Type A Clostridia, and poured with Dectomax. The heifers were poured with Saber Ultra on January 16.

The bulls were fed a TMR ration formulated by Darryl Ruppert of Purina Feeds. It's a 48 mega-cal dry matter ration. Our goal is for moderate gains so we do not burn out the bulls. We strive for soundness and longevity in our bulls. Our ADG for the 2016 sale bulls was 3.21 on a 113-day test.

BVD AND JOHNE'S STATUS

All animals in the herd were tested for BVD and tested negative. We also test for Johne's each year during preg check and have completed 5 years of testing. We remain at a Level 3 status.

Can't make the sale? Watch & bid online for FREE at www.dvauction.com !

DVAuction
Broadcasting Real-Time Auctions

Buying online is as easy as 1, 2, 3...

1. Create an account at www.dvauction.com under the "register" tab
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction-a DV representative will notify you once you have been approved
3. Tune in for the sale and make your purchases!

After the sale, contact the sale manager or owner to arrange transportation and payment. **High speed internet** is required for successful bidding-be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy Bidding-if you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

Having troubles?

During the auction, you can type a message to the operator at any time for assistance. Our full-time support team can also always be reached at (402) 474-5557.

KENNER SIMMENTAL RANCH

Black Purebred Bulls

BLACK PUREBRED BULLS

GW-WBF Substance 820Y

Homozygous Black **Homozygous Polled**

We used GW Substance in our AI program this past year to add a new pedigree for us. His EPD profile is super all the way across the board and we have been impressed with the muscle and thickness in his calves. Disposition is super. There is also one more son in the SimAngus section – Lot 64.

GW-WBF Substance 820Y - Sire of Lots 1-5

Lot 1

Lot 2

1 KS THOR C121 ASA# 2977436

Heterozygous Polled Homozygous Black • PB SM Bull

KS Black Diamond W992

Homozygous Black

Homozygous Polled

Black Diamond was our high-selling bull in 2010 to Traxinger Farm, SD and he has had tremendous success with him. We've used him in our AI program every year since then and have always had bulls in the sale and the females have beautiful udders and out-produce themselves. Our new donor cow that has 9 progeny in this sale is a Black Diamond daughter. Black Diamond adds performance in an adequate frame, great dispositions, and beautiful females. He was just recently sold to Teter Farms in West Virginia.

KR Sharp Shooter Z33 - Sire of Lots 17-18

KR Sharp Shooter Z33

Homozygous Black **Homozygous Polled**
Sharp Shooter was our pick of the bulls of the Edge of the West Sale in 2013 from Kaelberer Ranch, New Salem. The Sharp Shooter calves have done well, especially his females – you'll see a couple in the bred heifer section of this sale. Disposition is excellent and he specializes in moderate framed, easy fleshing cattle.

SCENES FROM THE 2015 SALE

Brian Maddock, Maddock, ND added 3 bulls to his herd!

Ashton Frei from Halliday fell in love with one of the red bulls on sale day last year. So much so, his parents ended up buying him!

This cutie may put some grey hairs on her parents when she's a teenager! Riley Frei, Halliday, had a fun time at the sale with other kids her age! Parents are Cody & Cathy Frei.

Larry Tourdot, Rockin R Simmental from Wisconsin made the trip again and purchased another heifer!

Larry Walford, Devils Lake, ND, purchased 3 half brothers to add to their pastures.

Four of the volunteers in the clerking office - Terri Lannoye, Rita Brossart, and Mandy and Jessica Johnson. We can't do it without all our wonderful volunteers!

Kirk Larson, Bisbee, ND, purchased a bull from us for the first time!

Neil Schell, Towner, ND, selected four bulls from the 2015 sale offering.

There was a great crowd on hand for the first sale on the ranch!

Denise & Harley Hallwachs, Pettibone, ND, purchased 3 bulls!

- Same cow family as lot 41.

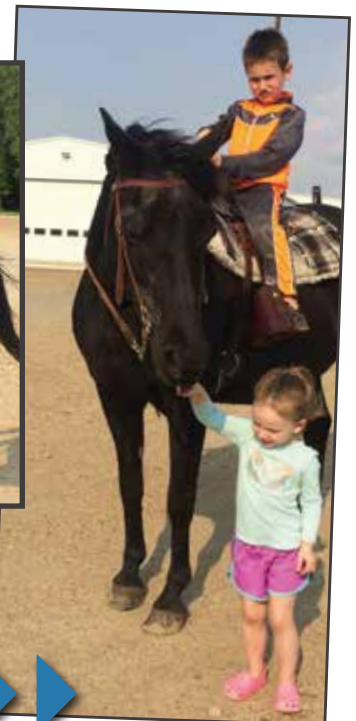

Roger and the grandkids! They spend hours driving things around the yard - the Ranger, the PT Cruiser, the tractor, whatever is available!

Lola giving "Cootie" a kiss after riding.

The grandkids, Osker & Lola, riding Cootie around the yard by themselves in the summer!

Thankfully Erika has a 28-year-old Morgan mare that does a lot of babysitting in the summer when the grandkids come to stay. Osker spends a lot of hours on "Cootie" and Lola spends more time walking around watching!

BLACK SIMANGUS BULLS

KS Miss Yanabel Y601 - Dam of Lots 30-37

KS Miss Yanabel Y601

Homozygous Black

Homozygous Polled

Yanabel is a typical Black Diamond daughter – great uddered, easy fleshing, and attractive. Her first calf sold in the bull sale for \$6,500 by Final Answer. She then was moved into the donor pen and we had 21 calves born this year. All but one bull calf made the sale and one of her daughters was selected for the ND State Sale. You will most likely see progeny from this cow for quite awhile.

Ellingson Identity 9104 - Sire of Lots 34-40

Ellingson Identity 9104

Purebred Angus

Last year we had one bull in the sale by Identity (the only bull calf born that year) and he ended up being the high-selling bull! We used him again and had more bulls born – you will be impressed. Many are from a flush and some are natural calves. They are stylish and perform well, especially for a calving ease pedigree.

- LD-GGP tested and EPDs are updated.
- Heifer bull prospect.
- Pedigree combines our two elite donor cows of KS Kayla and KS Demmi.

Bryan and Gay saying hello to their first granddaughter, Mia.

KS Mitzi X432 - Dam of Lots 45-50

KS Mitzi X432

Heterozygous Black

Homozygous Polled

Mitzi was the product of a mistake when breeding for ET work, but it ended well! She is a daughter of SAV Final Answer and our long-time donor cow, KS Demmi. Her first calf born was a red MJ Top Gear son that sold for \$9,000 to Sven & Andrea Carlson, Sheyenne, ND. This year, she has several bulls by different sires in this sale and she has clicked with everything. Mitzi has a great udder and is an attractive female. Mitzi has progeny selling in the red section as well – Lots 111-114.

Red Purebred Bulls

3D Red Power 150Z - Sire of Lots 65-74

3D Red Power 150Z

Non-diluted Red Homozygous Polled

We purchased Red Power with Bouchard Livestock in 2013 from 3D Simmentals in Lumsden, SK. Performance is his specialty, ranking in the top 1% of the breed for WW, YW & ADG! He puts thick tops, big butts and frame into his progeny. His disposition is excellent, in fact his sons could be labeled as too tame. We did not have any problems calving him on cows. If you need extra performance in your calves, a Red Power son is the way to go and there are 19 to choose from! Other sons in the sale are Lots 21, 49-50, & 112-117.

Red Purebred Bulls

BCLR ShamWow W611 - Sire of Lots 75-80

BCLR ShamWow W611

Non-diluted Red Homozygous Polled

ShamWow has been one of the best all-around bulls for us. We purchased him from Bichler Simmentals in 2010 and Doug Bichler named him ShamWow as he felt he could "Clean up any mess!" That is totally accurate. He is the type of bull that has excellent phenotype, calving ease, performance, carcass and disposition. Last year, we sold 19 sons in the sale, but he was injured in the pasture after that, so we do not have as many this year – only 8 plus one in the black SimAngus section. His daughters are exceptional– easy fleshing, beautiful udders and quiet dispositions – and there are a couple offered in this sale. You can always pick out the ShamWow progeny as he definitely stamps them! Other sons in the sale are Lots 46, and 118-119.

Bringing the cows home in the Fall. Seven mile cattle drive.

KWA FLYF Red Mountain 16Z

Non-diluted Red Homozygous Polled

We had the opportunity to purchase Red Mountain semen at a charity auction in Canada. We are the only ranch in the US to have semen on this bull. We used him on heifers and had great luck. The calves have performed well and give a little different pedigree for red calving ease bulls. Take advantage of the opportunity to own new genetics here!

WS All In W111

Non-diluted Red Homozygous Polled

All In has been a herdsire for us since 2010 when we selected him from the Wilkinsons offering in their sale. We had to sell him this past summer in the middle of breeding season due to an injury. He was a larger framed bull and his daughters crossed so well with our ShamWow bull. You will see that combination a lot in our females. All In offers calving ease and growth as he ranks in the top 3% of the breed for calving ease and the top 2% for weaning weight. It's hard to find that combination.

Red Purebred Bulls

KS Madagascar A889 - Sire of Lots 93-94

KS Madagascar A889

Non-diluted Red Homozygous Polled

Madagascar was selected in our 2014 sale by Keller's Broken Heart Ranch of Mandan, ND. We sampled him and had mainly heifer calves, which is why we only have 3 bulls in the sale. The heifers look really great in the replacement pen. Keller's also have some in their bull offering this year. Madagascar ranks in the top of the breed for many EPD categories and phenotypically does a great job. Another son sells as Lot 123.

Lot 94

Chris & Bryan loved it the day Erika's Quarter Horse/Morgan mare decided to walk home after we had the cows in, and Chris had to bring her back with the 4-wheeler. This is not Erika's main horse, but she didn't hear the end of this for awhile. It's definitely a horse vs 4-wheeler competition around this farm!

Here is one of Erika's good horses! Thunder is an 8-year-old Morgan gelding and really figured out his job this summer! He was grazing while Erika was picturing cows and didn't let any get too close!

The dams of lots 166, 168, 169, 170, 171, 192 & 195 are cows we purchased from Trans Ova a few years ago that were carrying IVF embryos for us and we continued to use them in our ET program. They did not settle on their embryo, but were exposed to a bull, which resulted in some good halfblood heifers. The dams are good commercial cows with good udders and good dispositions.

Bull Buyer's Quick Guide to ASA EPDs and \$ Indexes

Expected Progeny Differences (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing in what units they are expressed. For example, if the above case referred to weaning weight EPDs, sire A would be expected to sire 15 pounds more weaning weight than sire B. If calving ease was the trait, sire A would be expected to sire 15 percent more unassisted births in first-calf heifers; in other words, if sire B sired 30 assists in a group of 100 heifers, we would expect sire A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit www.simmental.org. Listed below are the units in which ASA EPDs are expressed:

All-Purpose Index (API): Dollars per cow exposed under an all-purpose-sire scenario. (See \$ Indexes for more details.)

Back Fat (BF): Inches of carcass backfat at 475 days.

Birth Weight (BW): Pounds of birth weight.

Calving Ease (CE): Percent of unassisted births when used on heifers.

Carcass Weight (CW): Pounds of carcass weight at 475 days.

Docility (DOC): Percent of offspring receiving a disposition score of 1 (docile).

\$ Indexes: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide pieces of the economic puzzle. This is where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on integrated commercial production. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

All-Purpose Index (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

Terminal Index (TI): Evaluates sires for use on mature Angus cows with all offspring put on feed and sold grade and yield.

Using API and TI: First, determine which index to use; if you are keeping replacements use API, if not, use TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years (\$50 diff. x 30 hd. x 4 yr.= \$6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit: www.simmental.org

Important disclaimer: DO NOT compare index values of purebreds of different breeds, hybrids of different breed composition or purebreds with hybrids — our system was not developed to make valid comparison among these groups. Therefore, you must first determine the breed and breed composition appropriate for your herd and use index values to compare animals within that population.
