Herdsman: Bryan Leapaldt • 701-466-2553 • 701-739-8764 Cell

Happy 2024! Those of us in North Dakota have sure enjoyed the winter up until the middle of January! The late October storm had us thinking it would be an early winter, but we were gifted a couple months of nice weather to get things done! We even pictured bulls without coats or gloves at the end of December! The cattle market has also been strong! With low cattle numbers, we should be able to see higher prices for a little while yet!

Our sale theme this year is “No extremes – committed to balance”. In many aspects, extremes are not positive. In cattle genetics, high extremes can cause problems just as low extremes can. How much calving ease is too much? We need to have a live calf, but we also need them to survive a North Dakota winter. How much yearling weight is too much before it leads to carcass deductions and inefficient cow sizes?

As you study our 2024 catalog, you will notice that we focus on balanced EPDs, while also focusing on structure, udder quality and disposition. Cattle need to be able to last for the long haul, whether that’s to cover ground in the pasture for many years or to perform in the feedlot until harvest. They need

to have problem-free udders and they need to be easy to handle as we know how important that is to so many family ranches. All these traits are not directly covered in the EPDs, requiring us to still pay attention to phenotype. We do always try to make our EPDs better, but we refuse to give up our balance to chase extremes.

We are excited about this group of bulls and feel they do provide a great balance of EPDs and phenotype in a package that will be profitable to our customers. They are powerful, functional, and are backed by strong cow families that have proven themselves in our herd. We welcome you to look at the bulls ahead of the sale or join us on sale day. As always, the sale will be online for your convenience, but we always love to see our customers in person so we can reconnect. Feel free to call us prior to the sale with any questions on the bulls or heifers, and if you visit the ranch beforehand, you will be entered into the \$500 drawing on sale day.

We look forward to seeing you February 10th at the ranch!

Sincerely,
Kenner Simmental Ranch

Erika Kenner, Tyler and Eleanor Lannoye

ANNOUNCEMENTS

Announcements made sale day, and from the auction block during the sale, take precedence over printed material associated with this sale. Anyone attending this sale attends at their own risk. Breeders or any of the sale staff will not be held responsible for any personal injury while attending this sale.

AIRPORT

Devils Lake Regional Airport (DVL) is served by United to Denver and has excellent facilities for light aircraft.

Leeds (D31), Maddock (6D3) and Rugby (KRUG) have airports for light aircraft. Check runway conditions before landing.

EPDS

BOLT EPDs pulled 12/26/2023. All the bulls have been HD-tested (and parent verified) and have the genomics incorporated in the EPDs in this catalog.

Catalog designed by

HERD HEALTH & DATA TEAM

Herd Veterinarian, Sheridan Animal Hospital, Harvey, ND

Pregnancy Ultrasound, Dr. JJ Hovde, High Plains Vet Service, Sydney, MT

PERFORMANCE DATA

All the performance data is included in this sale catalog. The gains are calculated on a 105-day test period from weaning until 12/26/23. The scrotal measurements were also taken on 12/26/23 and adjusted to a year of age.

VIDEOS

Videos of the bulls and heifers will be available on our website and DVAuction in the middle of January. Log on to www.kennersimmental.com.

SALE FORMAT

The cattle will sell by video on sale day. All the bulls and heifers will be penned next to the sale barn by 9 am on sale day and will stay in those pens throughout the sale.

TRUCKING

We will try to deliver the bulls to the buyer's farm, or we will assist buyers in coordinating loads and make the most economical trucking arrangements possible. All the bred heifers must be picked up on sale day or have trucking arrangements made soon after since they will be close to calving. For assistance with trucking arrangements, contact Erika.

INSURANCE

We can keep the bulls at home for no charge until April 1, but we recommend purchasing insurance.

For more information contact: Erika Kenner, 406-581-1188

TERMS & CONDITIONS

- We guarantee all bulls to be breeders and we reserve the right to test any bull in question as a non-breeder for a reasonable amount of time before making an adjustment. And, if the bull is declared a sound breeder by a competent veterinarian, he will be returned to the buyer. In case an adjustment is required, it will be made with a replacement of equal value to animal in question, credit on purchase of another animal, or return of purchase price.
- Each animal becomes property and therefore is also the risk of the purchaser after it is sold. We guarantee the cattle to be healthy sale day.
- For those who cannot attend the sale, we will honor a telephone order and guarantee your phone purchase to meet your request when inspected personally by you.
- Certificates of registry will be supplied by the seller.
- All cattle sell under terms and conditions of the American Simmental Association and will be available in the office on sale day by request.
- We reserve the right to collect 100 units of semen on any bull in the sale for in-herd use only. The collection would be at our expense and buyer's convenience. Each bull will sell to the buyer with 100% ownership opportunity.

Can't make it? Watch and bid online through DVAuction.

Log on to www.dvauction.com and register for the sale. *You must be approved prior to the sale, so please register early.*

KENNER SIMMENTAL RANCH

Understanding the Data

WHY USE EPDS?

We have included all the data we can for each animal in this catalog, but we strongly recommend using the EPDs the most. EPDs allow a buyer to compare the animals across the breed. If you look at the actual data of an animal, it only tells you how they compare in that particular herd. By using the EPDs, you can compare them across herds and within herds more accurately.

We've formatted our lot boxes to include the percentile ranking for each trait if they rank within the top 50% of the breed. This will make it easier to evaluate each animal.

CALVING EASE EPD

Please understand the CE EPD is actually **heifer** calving ease. This number tells you how those bulls will calve on heifers - % unassisted compared to the other bulls on heifers. For example: If Bull A has a CE EPD of 10 and Bull B has a CE EPD of 5, Bull A will have 5% more unassisted births than Bull B when used on heifers. If you are going to use the bull for cows, you do not need to have that number as high.

GENOMIC EPDS

There are several genomic tests available. The GGP 100K test qualifies the animals for AI sires and donor cows and tests for parentage. The results are incorporated in to the EPDs through the single-step system (BOLT) and increases the accuracy for each trait.

All the bulls and heifers in the offering have been GGP 100K tested and the resulting EPDs are in the catalog. If any bulls will be used in an AI program, they are already qualified as an AI sire.

DILUTION GENE (DL)

All the red animals in this sale are non-diluted (DLF). DLF means they are free of the dilution gene. Grey calves will not result from any of these animals when bred to black animals.

OH GENETIC TRAIT

OH or Oculocutaneous Hypopigmentation is a cosmetic genetic trait affecting Simmental cattle. It is a recessive trait so it is only possible from the mating of two carriers. It is non-lethal and doesn't affect performance of the animal, but the animals will have "white-colored" eyes and/or a diluted hair coat. The most popular recent ancestor that is the carrier is PVF-BF BF26 Black Joker. We have tested everything in our herd that could possibly be a carrier and have identified the ones in this sale as either **OHF (Free)** or **OHC (Carrier)**.

OHC means that animal carries the gene. If mated with other carriers, there is a possibility to see the trait. If not mated to carriers, you will not see the trait, but may pass the carrier gene to some of the progeny.

STAYABILITY EPD

The Stayability EPD is a very important EPD because we all need the cows to stay in the herd as long as possible to be profitable. But one needs to understand how it is calculated. Stayability EPD measures the length of time a cow stays in the herd from after her first calf until she is 6 years old. If she is culled before 6 years old, it will affect her Stayability EPD, as well as her sire and dam's. But if an animal is culled prior to having her first calf, the Stayability EPD is not affected. For example, if a whole sire group is culled due to disposition or structure, prior to breeding, it does not influence the Stayability EPD for that sire. The females aren't considered part of the herd until they have their first calf.

The Stayability EPD is the largest portion of the API Index as female retention is very important to profitability.

HERD HEALTH

BULL VACCINATIONS

Calfhood: Nasalgen 3-PMH & Bovilis Coronavirus

Pre-turnout: Alpha 7, Pyramid 5 + Prespense and Bovilis Coronavirus

Pre-weaning: Pyramid 5+ Prespense, Mycoplasma and Bovilis Coronavirus

Weaning: Ultrabac 7 and Synanthic Drench

30-day Post-Weaning: Pyramid 5 + Prespense

November: Poured with generic Ivermectin

January: Poured with Protectus

BRED HEIFER VACCINATIONS

Pre-breeding: Express FP5-VL5 and boosted with Express FP5-VL5

November: Scour Box 9 and Type A Clostridia

December: Poured with Dectomax

January: Scour Bos 4, Type A Clostridia, Poured with Protectus

The bulls were fed a TMR ration formulated by Tim Clark of Hubbard Feeds. Our ration is formulated on a moderate level of energy that's appropriate for the genetic type and the northern environment in order to develop bulls for breeding. We worked the bulls up to a 48 Mcal ration and kept them at that level during the test period. Our trace mineral program is designed to improve structural integrity, foot quality and immune function. They are on a high-end supplement program. Our average ADG for the 2024 sale bulls was a 3.3 on a 105-day test.

BVD AND JOHNE'S STATUS

All animals in the herd tested negative for BVD. We follow the state's guidelines for Johne's Testing and have maintained our Johne's Status.

Can't make the sale? Watch & bid online for FREE at www.dvauction.com !

DVAuction
Broadcasting Real-Time Auctions

Buying online is as easy as 1, 2, 3...

1. Create an account at www.dvauction.com under the "register" tab
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction-a DV representative will notify you once you have been approved
3. Tune in for the sale and make your purchases!

After the sale, contact the sale manager or owner to arrange transportation and payment. **High speed internet** is required for successful bidding-be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy Bidding-if you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

Having troubles?
During the auction, you can type a message to the operator at any time for assistance. Our full-time support team can also always be reached at (402) 474-5557.

Black Purebred Bulls (All Homo Polled)

BLACK PUREBRED BULLS

KS DUTTON H542

HOMOZYGOUS BLACK / HOMOZYGOUS POLLED

Dutton sold in our sale in 2021 to Ben Stroh of Tappen and we weren't able to collect semen from him the first year, so these are our first calves by him. We were very impressed with them in Stroh's herd and we have been extremely pleased with them here too! Performance, good muscle expression, structurally sound, good feet, and great dispositions. They have been standouts all summer! He has 6 sons in this sale – Lots 1 – 6.

Semen is available on KS Dutton through Kenners and Ben Stroh.

TNT DIVERSIFY H301

HOMOZYGOUS BLACK / HOMOZYGOUS POLLED

Diversify is a bull that was injured at TNT's before the sale in 2021, so he was pulled from their sale. Alta Genetics ended up buying him to use in the Beef on Dairy program. TNT has used him in their AI program and really liked him, and we were fortunate to use him also. Talk about added performance and frame! These boys are impressive! There are 14 in our sale and they are all packed full of power! They have a smoother muscle pattern, but are full of meat. The dispositions are amazing. In fact, it was very hard to picture any of them as they were too tame. 14 Sons sell as Lots 16 - 29.

HSR REPUBLIC J8

HOMOZYGOUS BLACK / HOMOZYGOUS POLLED

We purchased Republic from the Dakota Xpress Sale in 2022 from Hansen Simmentals for a heifer bull. He was used to clean up heifers and some high-performance cows, so some of his calves are a little later born. His sons have been performing well (his growth EPDs are in the top 2% & 4%) and he offers a bit of an outcross pedigree to our herd. His 3 sons sell as lots 33 - 35.

BLACK SIMANGUS BULLS

WL ACCOMPLISHMENT 003 AND DOUBLE J MISS X011

Our first calves by 003 were in our 2023 sale last year and were very well received! This year, we only have a couple from our ET program by the X011 donor. The 003 bull is owned by Wendel Livestock and we were able to use him in our AI/ET program. His EPD profile is balanced all the way across and he sires attractive, well-balanced, good natured bulls! The X011 cow doesn't need an introduction here as she never misses! Sons are Lots 36 - 37. Maternal brothers sell as Lots 5 & 6.

Black SimAngus Bulls (All Homo Polled)

BLACK SIMANGUS BULLS

WL ACCOMPLISHMENT 053

PUREBRED ANGUS

The 053 bull is a brother to 003 and was our purchase at the Wendel Angus sale a couple years ago. This is our 2nd calf crop by 053 and some of his sons sold well in the sale last year also. He was only used in the pasture, so many of his calves are later born, but they are very well-balanced, are attractive and yet full of muscle. He calved super on heifers and was also used on some high-performance cows. Sons of 053 sell as Lots 38 - 39.

KENNER SIMMENTAL RANCH

Red Purebred Bulls (All non-diluted, Homo Polled)

ROCKIN H CAPTIVATE J75

NON-DILUTED RED / HOMOZYGOUS POLLED

Captivate was the high-selling bull at the Rockin H Sale in Minnesota in 2002 for \$95,000 to Lazy C Diamond and Bichler Simmentals. We used him in our ET program and on some elite cows in our AI program. He carries a very well-balanced EPD profile and has added a lot of length and performance to his calves. The dispositions are excellent. Sons sell as lots 58 - 64.

KS ELSIE E820

NON-DILUTED RED / HOMOZYGOUS POLLED

Elsie is a daughter of KS Penny X395 and ShamWow! We have a few of those daughters in our herd and they all rise to the top each year with their calves. Elsie has been no stranger to this sale – two year's ago her Vanderbilt flush topped the sale and last year she had a Hang Over flush that sold well also. She also has a full sister in the Bichler Simmental program, KS Zada. Elsie has a good udder, a super disposition, and great feet and structure. She seems to click with every mating we throw at her! 4 Captivate sons sell as Lots 58 - 61.

KENNER SIMMENTAL RANCH

Red Purebred Bulls (All non-diluted, Homo Polled)

GW HILGER ONE 454H

3/4 SIMANGUS

NON-DILUTED RED / HOMOZYGOUS POLLED

Hilger is owned by All Beef and we sampled him in our AI program and we just keep being impressed by them more and more each day! They are hard to miss in the pen with their muscle shape and performance and he ranks in the top 4% for growth along with adding excellent carcass value. The dispositions are excellent. He's out of the same sire as GW Major Move, but still an outcross pedigree to most of our red cows. Four sons sell as Lots 65 - 68.

KENNER SIMMENTAL RANCH

Red Purebred Bulls (All non-diluted, Homo Polled)

KS NET INCOME H433

NON-DILUTED RED / HOMOZYGOUS POLLED

Net Income sold to Lazy C Diamond Ranch in the 2021 sale. He has proven himself to be a phenomenal bull to use on heifers. So we used him on heifers and high-performance cows. We've been very happy with the calves, especially for such a high calving ease sire. He also adds a great foot and great dispositions to his progeny. There are 6 sons selling as lots 75 - 80. Semen available on Net Income through Lazy C Diamond Ranch.

KS FOXY F37

3/4 SIMANGUS

NON-DILUTED RED / HOMOZYGOUS POLLED

Foxy's first progeny always rose to the top, so she made her way in to our donor pen and then Ben Stroh of Tappen purchased her from us to add to his donor pen. She is a very powerful cow, and Net Income balanced her out well! There are 3 sons by Net Income in this sale as Lots 75 - 77.

3/4 SIMANGUS

NON-DILUTED RED / HOMOZYGOUS POLLED

Vanderbilt was the high-selling bull in our 2020 sale going to Crosshair Simmentals and Doll Simmentals. Since then, he has sired high-selling progeny in all of our programs! The Vanderbilts are born with moderate birth weights, but they grow! They are easy to find in the pen and hard not to like. So far, the feet have been great along with the dispositions! Look to the Vanderbilts to add performance, thickness and to correct feet and structure issues. We also have one son by a Vanderbilt son – KS Tennessee. He was the high-selling Vanderbilt son in our 2022 sale to Bichler Simmentals and we share half of him. We only had 2 calves out of him last year – 1 bull and 1 heifer. Look for more of his progeny in the Bichler Simmental Sale this Fall! Five Vanderbilt sons sell as Lots 81 - 85 and the Tennessee son is Lot 86. Vanderbilt semen is available through owners.

Red Purebred Bulls (All non-diluted, Homo Polled)

KS BAYLOR G119

NON-DILUTED RED / HOMOZYGOUS POLLED

Baylor sold in our 2020 sale to Ben Stroh of Tappen and we used him in our AI program in the past, but we purchased him back in 2022 and used him in our pastures since then. Baylor's dam is KS Alivia A977, who is also the dam of KS Outburst and KS Calibrate (the Full Figures son selling to TNT Simmentals in 2023 and now leased to Genex). The maternal side of this pedigree is very consistent! Baylor adds performance in a moderate birth weight, has an excellent foot, and often puts the dark, cherry red color in his calves. Three sons sell as Lots 87 - 89 and two daughters sell as Lots 152 & 153.

PUREBRED RED ANGUS

Admiral was our selection of the Twedt Red Angus sale in 2021 for \$27,000. We were so impressed with his feet when we saw him! He has an excellent depth of heel and hoof angle which is getting harder to find it seems. We have used him each year on heifers and all the Red Angus cows as cleanup as well as some high-performance Simmental cows to make 1/2 SimAngus. He's in the top 25% for BW, yet also in the top 10% for growth and adds a tremendous amount of muscle to his calves! Adding in his great foot quality, he is an asset to the Red Angus breed. We sold him to Westphal Red Angus at the end of the breeding season this year. They have used him in their AI program and now will run him in their pasture as well. Look for more progeny in the future in their program! Sons sell as Lots 97 - 98 in the Red SimAngus section and Lots 99 - 104 in the PB Red Angus section. Daughters sell as Lots 161 - 165.

The Seasons of North Dakota

Cows grazing in the hills in early June when the grass was green!

Rotating pastures in the hills in the middle of the summer.

Moving cows out of the hills after the October blizzard!

KENNER SIMMENTAL RANCH

2023 Sale Highlights

Photo credit – Morgan (Leapaldt) Anderson

ASA Simmental Specialist Perry Thomas with his son-in-law, Derik Samuelson and his kids Peyton and Sawyer!

UND Head Football coach, Bubba Schweigert, attended the sale to promote Meat Up for UND! Pictured with Roger and Keith Johnson, Sharon, ND.

Emerson Marsh, Dickinson, ND, and his brand new family of 3 enjoyed the sale and purchased a couple bulls!

Bryan Leapaldt visits with Corey Polensky from Dickinson, ND.

Barry Steffan from Dickinson makes the drive each year to select bulls for himself and his uncle Duane!

Larry & Michelle Tourdot came from Wisconsin again to pick out a bull and a heifer!

Everett Wieland and his son Cody, Streeter, ND, looking at bulls before the sale.

Longtime friends, Roger and Joe Bata!

Bryan with his grandkids on sale day!

Jason Topp, Grace City, ND, got to enjoy a day with his daughter at the sale!

Sven Carlson, Sheyenne, ND, had good help along to select his bulls, and the girls were able to select heifers for themselves!

Todd Finke brought his daughter Anna with him to the sale!

It was a Father/Daughter day!

Bull Buyer's Quick Guide to ASA EPDs and \$ Indexes

Expected Progeny Differences (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing in what units they are expressed. For example, if the above case referred to weaning weight EPDs, sire A would be expected to sire 15 pounds more weaning weight than sire B. If calving ease was the trait, sire A would be expected to sire 15 percent more unassisted births in first-calf heifers; in other words, if sire B sired 30 assists in a group of 100 heifers, we would expect sire A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit www.simmental.org. Listed below are the units in which ASA EPDs are expressed:

All-Purpose Index (API): Dollars per cow exposed under an all-purpose-sire scenario. (See \$ Indexes for more details.)

Back Fat (BF): Inches of carcass backfat at 475 days.

Birth Weight (BW): Pounds of birth weight.

Calving Ease (CE): Percent of unassisted births when used on heifers.

Carcass Weight (CW): Pounds of carcass weight at 475 days.

Docility (DOC): Percent of offspring receiving a disposition score of 1 (docile).

\$ Indexes: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide pieces of the economic puzzle. This is where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on integrated commercial production. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

All-Purpose Index (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

Terminal Index (TI): Evaluates sires for use on mature Angus cows with all offspring put on feed and sold grade and yield.

Using API and TI: First, determine which index to use; if you are keeping replacements use API, if not, use TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years (\$50 diff. x 30 hd. x 4 yr.=\$6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit: www.simmental.org

Important disclaimer: DO NOT compare index values of purebreds of different breeds, hybrids of different breed composition or purebreds with hybrids — our system was not developed to make valid comparison among these groups. Therefore, you must first determine the breed and breed composition appropriate for your herd and use index values to compare animals within that population.

Maternal Calving Ease (MCE): Percent of unassisted births in first-calving daughters.

Milk (MLK): Pounds of weaning weight due to milk.

Marbling (MRB): Carcass marbling score at 475 days.

Maternal Weaning Weight (MWW): Pounds of weaning weight due to milk and growth.

Ribeye Area (REA): Square inches of carcass ribeye at 475 days.

Stayability (STAY): Percent of daughters remaining in the cowherd at six years of age.

Terminal Index (TI): Dollars per cow exposed under a terminal-sire scenario. (See TI for more details.)

Warner-Bratzler Shear Force (WBSF): Pounds of force required to shear a rib-eye steak.

Weaning Weight (WW): Pounds of weaning weight.

Yearling Weight (YW): Pounds of yearling weight.

Yield Grade (YG): Carcass yield grade score at 475 days.
