erika.kenner@gmail.com
Herdsman: Bryan Leapaldt • 701-466-2553 • 701-739-8764 Cell

Welcome!

What a year it was in 2021! I think we are all glad it's over! I don't think I've ever been as worried as I was in May, June & July when we were wondering if we'd ever have enough feed to keep our cows through the winter. I know most everyone in North Dakota dealt with extremely dry conditions and some areas were better than others, but we all still had the stress of finding feed. We were lucky in this area to start receiving moisture in August that didn't stop all the way through October, and now it doesn't quit snowing! What a 360 it has been here! Our pastures were greener in the Fall than they were in Spring, which was strange, but welcomed. We realize that hasn't been the case everywhere, and we are still praying for rain for those areas for this Spring.

We are proud of the offering we have in the sale this year! Despite the drought, they still weaned off well and haven't looked back since! We have some new, exciting pedigrees this year and whether you need a calving ease bull for heifers or a power bull for cows, we will have something for you!

We have worked hard through the years to build a cowherd that works for us and for our customers. We strive for functional, easy-keeping cows that milk with problem-free udders and are easy to be around. They need to cover ground, so they must be structurally sound and have good feet. The key to profitability is keeping the cows productive in the herd as long as possible. Structure and soundness is important in making that happen. We

are focused on maintaining good structure and feet in our herd along with performance, maternal and carcass traits.

EPDs are also important to us and when we are choosing bulls for ourselves, we weigh heavily on the use of genomically enhanced EPDs. When EPDs are genomically enhanced, we gain much more accurate information. For many traits, it is the equivalent of having 20 progeny records reported. We encourage our customers to also use them, as they are a proven tool in the tool box. If anyone has any questions on how to use EPDs, please call us and we can help explain how to use and understand them.

We strongly encourage everyone to attend the educational program we are having the night before the sale at 5:00 pm at the sale facility. Chip Kemp from the American Simmental Association will speak and answer any questions people may have on understanding data, how to use the programs offered to become more profitable and update us on what is going on in the industry. He will be able to talk on a variety of topics, as he has experience on many levels of the industry.

Feel free to look at the bulls ahead of time, so you aren't rushed on sale day! Enter for the \$500 sale credit drawing by visiting the farm prior. We look forward to seeing you on February 12, 2022, at the ranch for the sale, if not before!

Sincerely,

The Kenner Simmental Ranch Team

ANNOUNCEMENTS

Announcements made sale day, and from the auction block during the sale, take precedence over printed material associated with this sale. Anyone attending this sale attends at their own risk. Breeders or any of the sale staff will not be held responsible for any personal injury while attending this sale.

AIRPORT

Devils Lake Regional Airport (DVL) is served by United to Denver and has excellent facilities for light aircraft.

Leeds (D31), Maddock (6D3) and Rugby (KRUG) have airports for light aircraft. Check runway conditions before landing.

EPDS

BOLT EPDs pulled 12/28/2021. All the bulls have been LD-tested (and parent verified) and have the genomics incorporated in the EPDs in this catalog.

HERD HEALTH & DATA TEAM

Herd Veterinarian, Sheridan Animal Hospital, Harvey, ND

Pregnancy Ultrasound, Dr. JJ Hovde, High Plains Vet Service, Sydney, MT

Carcass Ultrasound, Jason McLennan, Inc., St. Onge, SD

PERFORMANCE DATA

Complete ultrasound data will be available before the sale by logging on to www.kennersimmental.com. Data will also be available on sale day.

VIDEOS

Videos of the bulls and heifers will be available on our website in the middle of January. Log on to www.kennersimmental.com.

SALE FORMAT

The cattle will sell by video on sale day. All the bulls and heifers will be penned next to the sale barn by 9 am on sale day and will stay in those pens throughout the sale.

TRUCKING

We will try to deliver the bulls to the buyer's farm, or we will assist buyers in coordinating loads and make the most economical trucking arrangements possible. All the bred heifers must be picked up on sale day or have trucking arrangements made soon after since they will be close to calving. For assistance with trucking arrangements, contact Erika.

INSURANCE

We can keep the bulls at home for no charge until April 1, but we recommend purchasing insurance.

For more information contact: Erika Kenner, 406-581-1188

TERMS & CONDITIONS

- We guarantee all bulls to be breeders and we reserve the right to test any bull in question as a non-breeder for a reasonable amount of time before making an adjustment. And, if the bull is declared a sound breeder by a competent veterinarian, he will be returned to the buyer. In case an adjustment is required, it will be made with a replacement of equal value to animal in question, credit on purchase of another animal, or return of purchase price.
- Each animal becomes property and therefore is also the risk of the purchaser after it is sold. We guarantee the cattle to be healthy sale day.
- For those who cannot attend the sale, we will honor a telephone order and guarantee your phone purchase to meet your request when inspected personally by you.
- Certificates of registry will be supplied by the seller.
- All cattle sell under terms and conditions of the American Simmental Association and will be available in the office on sale day by request.
- We reserve the right to collect 100 units of semen on any bull in the sale for in-herd use only. The collection would be at our expense and buyer's convenience. Each bull will sell to the buyer with 100% ownership opportunity.

Can't make it? Watch and bid online through DVAuction.

Log on to www.dvauction.com and register for the sale. *You must be approved prior to the sale, so please register early.*

KENNER SIMMENTAL RANCH

Understanding the Data

WHY USE EPDS?

We have included all the data we can for each animal in this catalog, but we strongly recommend using the EPDs the most. EPDs allow a buyer to compare the animals across the breed. If you look at the actual data of an animal, it only tells you how they compare in that particular herd. By using the EPDs, you can compare them across herds and within herds more accurately.

We've formatted our lot boxes to include the percentile ranking for each trait if they rank within the top 50% of the breed. This will make it easier to evaluate each animal.

CALVING EASE EPD

Please understand the CE EPD is actually **heifer** calving ease. This number tells you how those bulls will calve on heifers - % unassisted compared to the other bulls on heifers. For example: If Bull A has a CE EPD of 10 and Bull B has a CE EPD of 5, Bull A will have 5% more unassisted births than Bull B when used on heifers. If you are going to use the bull for cows, you do not need to have that number as high.

GENOMIC EPDS

There are several genomic tests available. The new LD test is 150K SNPs and is accepted for AI sires and donor cows now. The results are incorporated in to the EPDs through the single-step system (BOLT) and increases the accuracy for each trait.

All the bulls in the offering have been LD tested with the new LD test and the resulting EPDs are in the catalog. If any bulls will be used in an AI program, they are already qualified as an AI sire.

DILUTION GENE (DL)

All the red animals in this sale are non-diluted (DLF). DLF means they are free of the dilution gene. Grey calves will not result from any of these animals when bred to black animals.

OH GENETIC TRAIT

OH or Oculocutaneous Hypopigmentation is a cosmetic genetic trait affecting Simmental cattle. It is a recessive trait so it is only possible from the mating of two carriers. It is non-lethal and doesn't affect performance of the animal, but the animals will have "white-colored" eyes and/or a diluted hair coat. The most popular recent ancestor that is the carrier is PVF-BF BF26 Black Joker. We have tested everything in our herd that could possibly be a carrier and have identified the ones in this sale as either **OHF (Free)** or **OHC (Carrier)**.

OHC means that animal carries the gene. If mated with other carriers, there is a possibility to see the trait. If not mated to carriers, you will not see the trait, but may pass the carrier gene to some of the progeny.

DD GENETIC CONDITION

Developmental Duplication (DD) is a genetic condition where the affected calves frequently develop extra body parts (often limbs), a condition called polymelia. This is a non-lethal, recessive trait, so the animal needs to have both genes for it to show signs. If you have a carrier (DDC), you do not want to mate that animal to another carrier animal.

HERD HEALTH

BULL VACCINATIONS

Calfood: Nasalgen 3-PMH & Bovilis Coronavirus

Pre-turnout: Alpha 7, Pyramid 5 and Bovilis Coronavirus

Pre-weaning: Pyramid 5+ Presponse, Mycoplasma and Bovilis Coronavirus

Weaning: Ultrabac 7 and Dectomax Injectable

30-day Post-Weaning: Bovishield Gold 5

January: Poured with Cleanup II

BRED HEIFER VACCINATIONS

Pre-breeding: Express FPS-VL5 and boosted with Express FPS-VL5

November: Scour Box 9 and Type A Clostridia

January: Scour Bos 4, Type A Clostridia, Wormed with Safeguard and Poured with Cleanup II

The bulls were fed a TMR ration formulated by Tyler Melroe of Hubbard Feeds. Our ration is formulated on a moderate level of energy that's appropriate for the genetic type and the northern environment just as our feeder cattle are fed. Our trace mineral program is designed to improve structural integrity, foot quality and immune function. They are on a high-end supplement program. Our average ADG for the 2022 sale bulls ADG was 3.9 on a 117-day test.

BVD AND JOHNE'S STATUS

All animals in the herd tested negative for BVD. We follow the state's guidelines for Johne's Testing and have maintained our Johne's Status.

Can't make the sale? Watch & bid online for FREE at www.dvauction.com !

DVAuction
Broadcasting Real-Time Auctions

Buying online is as easy as 1, 2, 3...

1. Create an account at www.dvauction.com under the "register" tab
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction-a DV representative will notify you once you have been approved
3. Tune in for the sale and make your purchases!

After the sale, contact the sale manager or owner to arrange transportation and payment. **High speed internet** is required for successful bidding-be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy Bidding-if you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

Having troubles?

During the auction, you can type a message to the operator at any time for assistance. Our full-time support team can also always be reached at (402) 474-5557.

HOMOZYGOUS BLACK / HOMOZYGOUS POLLED
PUREBRED SIMMENTAL

Manifesto was the \$67,000 bull from the Bichler Simmental Sale in 2019. He is owned by LCDR Simmental and Bichler Simmental. We loved Manifesto when he sold and tried hard to own him. We AI'd heavily to him and we love the calves, as he proved to be a performance bull. The bulls are stout with thick tops and great muscle shape. They are super gentle and laid back and the feet look excellent at this point. Look to the Manifesto's to add performance, docility, and soundness into your herd. We're expecting his daughters to be good too! Sons sell as Lots 1 – 10.

CLRS GUARDIAN 317G

HOMOZYGOUS BLACK / HOMOZYGOUS POLLED
PUREBRED SIMMENTAL

Guardian was the high-selling bull from the 2020 Bred For Balance Sale. He is an outcross pedigree for us and has an amazing EPD profile, so we utilized him in our AI program on heifers and high-performance cows. He calved like a dream on heifers. Many of his sons in this sale will be suitable for heifers, so if you need a bull for yearlings, make sure to take note. Sons sell as Lots 17-25.

KS MISS YAWNA Y541 HOMOZYGOUS BLACK / HOMOZYGOUS POLLED / PUREBRED SIMMENTAL

Y541 has been such a solid-producing cows for years. She's sold many bulls in the sale and all her daughters have been kept in the herd and have produced great bulls in the sales. In fact, one of her daughters is also now a donor for us. Last year, she had an Alamo son in the sale (the only bull born of the flush) and this year she has the Guardian flush. E959 has an excellent udder, a great disposition and great structure and feet. We will be getting photos of the all the donors this summer. Sons sell as Lots 17 & 18 and grandson sells as Lot 35. Photo will be taken of Y541 this summer.

• 25% of the proceeds of Lot 18 will go directly to ASEF to aid in long term financial stability of judging teams at NDSU. Go Bison!

NDSU JUDGING TEAM ALUMNI ASSOCIATION

Designated Lot

The judging team experience available at NDSU is important to us. The Animal Science Education Foundation (ASEF) was established to raise funds for the sole purpose support of judging team activities within the Animal Science department at NDSU. The "designated lot" is a program for producers to contribute to support scholarships and program enhancement.

COLORADO BRIDLE BIT E752

HOMOZYGOUS BLACK / HOMOZYGOUS POLLED

PUREBRED SIMMENTAL

This is our 3rd calf crop by Colorado. He is owned by Mike Traxinger, SD. He works perfect on heifers and high-performance cows. Not only do they calve easy, they are stylish, deep bodied and have adequate thickness. Plus, we've found out that we love his daughters – they are easy fleshing, super to deal with and have beautiful udders! His EPD profile is well balanced all the way across. He works well in combination with the power females in our herd. Sons sell as Lots 36-38 and his daughters sell as Lots 122-123.

DOUBLE J X011

HOMOZYGOUS BLACK / HOMOZYGOUS POLLED
PUREBRED SIMMENTAL

X011 should not be a stranger to anyone. For the past several years, there have been many bulls in the sale by her and several different sires. All of her matings click! This year, we only have 2 bulls by her in the sale – one by TJ Franchise and one by Sitz Stellar. The Franchise is a full brother to the ones that sold last year and the Stellar was the only embryo from that mating and luckily it stuck, as he is tremendous! X011 stamps her calves with so much length, depth and muscle shape and gives them an unbelievable disposition. They are easy to be around and to admire. Sons sell as Lots 41-42 and grandsons are Lots 49, 50 & 53.

SITZ STELLAR 726D

HOMOZYGOUS BLACK / HOMOZYGOUS POLLED
PUREBRED ANGUS

We are so impressed with our first Stellar's! Since they were born, they've caught our eye as they have style, yet they are impressively stout made, sound and fluid moving, stand on a great foot and have excellent dispositions. We used Stellar in our ET program and on heifers and will be using more of him in the future. Stellar sons sell as Lots 42-47.

KS POINT BLANK G414

HOMOZYGOUS BLACK / HOMOZYGOUS POLLED

1/2 SM 1/2 AN

We raised Point Blank (S Powerpoint WS 5503 son), but he had an injury before we cataloged in 2020. We kept him out of the sale to see if he'd heal. Once he was healed, we needed an extra bull, so we kept him for ourselves. His dam is an extremely powerful cow, and he inherited her power! His sons are impressive, stout bulls in the sale with good feet and are very docile. If you need more performance, the Point Blank sons will fit the bill! Sons sell as Lots 50-54.

Red Purebred Bulls (All non-diluted)

KS VANDERBILT G220

KS VANDERBILT G220

NON-DILUTED RED / HOMOZYGOUS POLLED

3/4 SM 1/4 AR

Vanderbilt was the high-selling bull in the 2020 sale selling to Crosshair Simmental and Doll Simmental Ranch and you'll see sons selling in their programs this year also! Most of the Vanderbilt's in our sale this year are ET calves by a couple different donors. The Vanderbilt's have a lot of performance with a moderate birth weight. His birth weight EPD actually went down after all his calves were reported, yet he's still a performance bull with his growth EPDs in the top 1% of the breed! His progeny are dark, cherry red and the dispositions have been excellent. Sons sell as Lots 57-67.

KS ELSIE E820 NON-DILUTED RED / HOMOZYGOUS POLLED / PUREBRED SIMMENTAL

Elsie is a daughter of KS Penny X395 and ShamWow! We have a few of those daughters in our herd and they all rise to the top each year with their calves. A full sister is also, KS Zada, in the Bichler program. A few X395 daughters have made their way to the donor pen now! The first flush we did with Elsie was KS Vanderbilt and these calves are powerful! Elsie has a good udder, a super disposition, and great feet and structure. Photo will be taken this summer. Sons sell as Lots 57-62.

- Bryan purchased dam from Bichler Simmentals at the ND State Sale in 2014.
- She is a Zada daughter who is a Penny x ShamWow like many dam's of bulls in this sale.

PAST SONS OF A977

KS ALIVIA A977

NON-DILUTED RED / HOMOZYGOUS POLLED
PUREBRED SIMMENTAL

Alivia A977 is most known as the mother of KS Outburst and KS Baylor. She also has two daughters at home who always bring top-end calves to the sale or in the herd. She finally made it to the donor pen! She only had 3 bull calves born by the Future mating along with a lot of heifers and all 3 bulls made the sale. The bulls are tremendously powerful and impressive. Photo will be taken this summer. Sons sell as Lots 68-70 and grandsons are Lot 66 & 84.

KWA FUTURE 3G

NON-DILUTED RED / HOMOZYGOUS POLLED
PUREBRED SIMMENTAL

We purchased Future from Ashworth Farm in Saskatchewan in 2020 and his semen rights are owned by Bouchard Livestock. This is his first calf crop and at this point he has passed all the tests. We purchased him for a heifer bull, and he worked well for us. His calves also have growth, as you will see in some of his sons in the sale. He was used on heifers and cows and some progeny will be calving ease also. He was injured this Fall, so we were unable to get an updated photo, but he looked amazing until his injury and he is one of the easiest bulls to be around. Sons sell as Lots 68-76.

KS OUTBURST F119

KS OUTBURST F119

NON-DILUTED RED / HOMOZYGOUS POLLED
PUREBRED SIMMENTAL

Performance, performance, performance!!! Outburst is a growth bull! His calves are extremely thick and stout and still have great structure and feet. Outburst sold to TNT Simmentals in our 2019 sale for \$32,000 and was injured before delivery. He was not able to be used that breeding season, so we bought him back. This is his first calf crop. The calves were bigger at birth, but all came unassisted. He was used on hetero black cows also, so he has progeny in the Black SimAngus and Black Purebred sections too. Sons sell as lots 77-78 in the red section and Lots 30-31 in the blacks.

Chip Kemp
American Simmental Association

Join us for an educational program with Chip Kemp on Friday, February 11, at 5:00 pm at the sale facility.

Chip Kemp is the Director of ASA and IGS Commercial and Industry Operations. His duties range from assisting progressive commercial producers with genetic awareness of crossbred cow herds to the development of new technologies that highlight the profit potential of genetic knowledge in the beef industry – regardless of breed type. IGS is the largest beef genetic evaluation on the planet and provides multi-breed EPDs to those involved. The awareness and data from this approach provide meaningful tools to all facets of the beef industry.

Prior to ASA, Chip was an instructor for 18 years at the University of Missouri. In this role, he was involved in classroom teaching, coaching of competitive livestock judging teams, oversight of internships, and coordination of a USDA approved meats processing facility. Chip was also the founder of JudgingPro.com, an online resource for livestock evaluation videos and classroom aids. He spent two years with the Beef Division of IBP, inc. in Amarillo, TX. He grew up working for Gerloff Farms, an Angus and SimAngus seedstock operation based in Missouri, and is still involved with this program. Chip and his wife Nicky, have two grown children and reside in Auxvasse, MO.

NON-DILUTED RED / HOMOZYGOUS POLLED
3/4 SM 1/4 AN

We sold our first calves by Intrigue last year. This year we only have ET sons in the sale by BGL Zahara Z159B. These calves are all peas in a pod. This mating really clicked. Sons sell as Lots 79-81. Daughters sell as Lots 170-173.

BGL ZAHARA Z159B NON-DILUTED RED / HOMOZYGOUS POLLED / PUREBRED SIMMENTAL

Z159B is owned by Bryan Leapoldt and was added to the donor pen as she consistently produced calves that rose to the top and she has an impressive EPD profile. She has females in the herd who are consistent producers, and she has produced several top-end bulls in previous sales. This year, there are sons by two matings – RFS Bulletproof and LCDR Intrigue – and they sure are standouts! Photo will be taken this summer. Sons sell as lots 79-82.

KS TRIPLE PLAY B25

NON-DILUTED RED / HOMOZYGOUS POLLED
PUREBRED SIMMENTAL

Triple Play sold to G&D Simmentals in our 2015 Sale and has been a popular herd sire for them since. We finally used him in our AI program on heifers and high-performance cows and we wish we would've used him earlier. He was injured at the end of last breeding season and is no longer around and all the semen is gone. The Triple Play calves are eye-catching. They are deep, thick, sound, extremely gentle and have great feet. We also purchased a son of him at the G&D Sale last year, Mr GD Triple Crown, who we used on heifers in the pasture this year and we are excited for his calves. Sons of Triple Play sell as Lots 89-96.

Mr GD Triple Crown H038

Introducing our new herd sire by KS Triple Play B25! We love Triple Play so much, we purchased his son, Triple Crown, in the 2021 G&D Simmentals Sale to use on our heifers in the pasture. There are sale heifers in this sale bred to him. We are excited to see his calves this Spring!

KENNER SIMMENTAL RANCH

BRIDLE BIT RED ROCK G9124

NON-DILUTED RED / HOMOZYGOUS POLLED
3/4 SM 1/4 AN

Red Rock is owned by Traxinger Simmentals, SD, and we used him in our AI program on heifers. He was an outcross pedigree for us. They calved easy, as he is definitely a dependable heifer bull. Most of his sons in this sale are heifer bulls, so if you are looking for a calving ease bull for your heifers, check these out! Sons sell as Lots 97-101.

KS NEWTON D181

NON-DILUTED RED / HOMOZYGOUS POLLED

5/8 SM 1/4 AR 1/8 AN

Newton was one of the Commotion sons that sold in our 2017 sale to Dan Birkeland from Sheyenne, ND. After a couple years, we purchased him back from Dan. He got hurt at the end of breeding last year and we had to sell him. This will be his last natural calf crop. We used Newton on heifers and high performing cows. Besides a great phenotype, he also fixes a lot of maternal calving ease issues and his calves are super docile. All the bulls in the sale by Newton this year were born the end of March or in April. Sons sell as Lots 108-109. Daughters sell as Lots 184-186.

Thank you to Dr. Judy Gibbens of Gibbens Veterinary Service for her many years of veterinary service to our area and to us. We were lucky to have her as our veterinarian these past many years and we will miss her! Enjoy your retirement Judy!!

Thank you to the Gabe & Shanon Erbele Family for raising some of our ET calves again last year! There are many bulls in the sale this year that were raised at their place and they did an excellent job! Those are the last calves that will be raised at their ranch, as they are taking on a bigger role with TNT Simmentals and do not have room for extra cows! We wish them the best of luck in their first bull sale at their ranch this year!

Dam of Lot 111 – Purebred Red Angus cow

• Purchased dam from Huber EY Cattle at the ND State Red Angus Sale in 2016.

• Same cow family as Lot 89.

KENNER SIMMENTAL RANCH

Red Angus Bulls

PUREBRED RED ANGUS

We have focused our Red Angus program around calving ease and carcass traits, but we are selective on udder quality, disposition and feet as well. We have 8 yearlings in the offering this year. The Red Angus are registered with the American Simmental Association and can be registered with the Red Angus Association of America upon request.

ALC MR RIGHT KIND C13

NON-DILUTED RED / HOMOZYGOUS POLLED
PUREBRED RED ANGUS

We purchased Right Kind C13 in 2016 from the Pelton Red Angus sale in KS. We've used him as clean-up in our Purebred Red Angus program and on Simmental heifers and high birth weight Simmental cows since then. He lasted in our herd until he got an injury last year and he had perfect feet until the end. He calved easy and had a great disposition. He was a true calving ease bull, yet when we combine him with higher growth females, it's a great combination. Sons sell as Lots 114-115 and daughters as Lots 185-186.

SCENES FROM AROUND THE FARM IN 2021!

The Drought of 2021 brought challenges.

It's fun to see the different wildlife around the farm.

The Fall rains brought green grass and water to allow for Fall grazing!

OVER DRAFT PICK 413D

NON-DILUTED RED / HOMOZYGOUS POLLED
PUREBRED RED ANGUS

We decided to use Draft Pick because we heard he had great feet and the calves were looking good! We are glad we chose him. At this point, the progeny's feet look good and the bulls are smooth, thick and eye-appealing. These bulls should calve easy, yet also have adequate growth, especially when using on heifers. The dispositions are excellent. Sons sell as Lots 110, & 116-120.

We are honored to provide the donation heifer this year to the NDSU Judging Club!

Contact an NDSU Judging Club member to buy tickets or buy tickets through us! Drawing will be held March 2, 2022 at 5:00 pm in Shepperd Arena.

Need not be present to win.
\$20/ticket or 6 for \$100

For more information on tickets, contact NDSU Animal Science Department or Kenner Simmental Ranch!

Janessa's dam is in the ET donor pen and is a beautiful female. We expect Janessa to follow in her footsteps. She is a feminine heifer who still has the power and performance to produce profitable calves!

Bred Heifer Service Sires

Heifers were pregnancy ultrasounded by Dr. JJ Hovde on August 13, 2021 and they were pregnancy checked on September 20, 2021 by Dr. Kara (Sheridan Animal Hospital).

KENNER SIMMENTAL RANCH

Bull Buyer's Quick Guide to ASA EPDs and \$ Indexes

Expected Progeny Differences (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing in what units they are expressed. For example, if the above case referred to weaning weight EPDs, sire A would be expected to sire 15 pounds more weaning weight than sire B. If calving ease was the trait, sire A would be expected to sire 15 percent more unassisted births in first-calf heifers; in other words, if sire B sired 30 assists in a group of 100 heifers, we would expect sire A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit www.simmental.org. Listed below are the units in which ASA EPDs are expressed:

All-Purpose Index (API): Dollars per cow exposed under an all-purpose-sire scenario. (See \$ Indexes for more details.)

Back Fat (BF): Inches of carcass backfat at 475 days.

Birth Weight (BW): Pounds of birth weight.

Calving Ease (CE): Percent of unassisted births when used on heifers.

Carcass Weight (CW): Pounds of carcass weight at 475 days.

Docility (DOC): Percent of offspring receiving a disposition score of 1 (docile).

\$ Indexes: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide pieces of the economic puzzle. This is where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on integrated commercial production. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

All-Purpose Index (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

Terminal Index (TI): Evaluates sires for use on mature Angus cows with all offspring put on feed and sold grade and yield.

Using API and TI: First, determine which index to use; if you are keeping replacements use API, if not, use TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years (\$50 diff. x 30 hd. x 4 yr. = \$6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit: www.simmental.org

Important disclaimer: DO NOT compare index values of purebreds of different breeds, hybrids of different breed composition or purebreds with hybrids — our system was not developed to make valid comparison among these groups. Therefore, you must first determine the breed and breed composition appropriate for your herd and use index values to compare animals within that population.

Maternal Calving Ease (MCE): Percent of unassisted births in first-calving daughters.

Milk (MLK): Pounds of weaning weight due to milk.

Marbling (MRB): Carcass marbling score at 475 days.

Maternal Weaning Weight (MWW): Pounds of weaning weight due to milk and growth.

Ribeye Area (REA): Square inches of carcass ribeye at 475 days.

Stayability (STAY): Percent of daughters remaining in the cowherd at six years of age.

Terminal Index (TI): Dollars per cow exposed under a terminal-sire scenario. (See TI for more details.)

Warner-Bratzler Shear Force (WBSF): Pounds of force required to shear a rib-eye steak.

Weaning Weight (WW): Pounds of weaning weight.

Yearling Weight (YW): Pounds of yearling weight.

Yield Grade (YG): Carcass yield grade score at 475 days.
