

The background of the entire image is a photograph of a snowy field with several Simmental cattle. Some are black, some are red, and some are black and red. They are standing in the snow, with a line of bare trees in the background under a cloudy sky. The word "Kenner" is written in a large, stylized, cursive font with a blue outline and a white drop shadow. Below it, the words "SIMMENTAL RANCH" are written in a bold, black, sans-serif font.

2018 was a busy year around the Kenner Ranch! Besides the normal workload of farming and ranching, we also threw in Erika & Tyler's wedding in October! It was a windy day, but it all went well and we celebrated with many family and friends!

This year was challenging for all of us in the farming and ranching communities. Between the weather, the prices, and harvest dragging on forever, many are hoping 2019 will be better. There are so many things out of our control in this business and sometimes makes a person wonder, why we do this! But I think all of us agree we wouldn't trade it for anything. We get to work closely with the land and animals God gave us and make food for the world.

Another challenge in our industry is selecting new genetics for next year. Whether it be crop seed or bulls and females – the selection is important as it sets the course of our income and direction for the years to come. It's hard to know how the genetics will work exactly, but we look at data to figure out the best decision we can make at the time – crop trials and EPDs – we use data.

We measure everything we can to ensure all the data on our bulls is as accurate as possible. We have also been retaining ownership of our steers the last few years and receiving the kill data back. We've been pleased with how they've performed at the feedlot and on the rail. Now with the new single-step system in place at ASA (BOLT), the DNA incorporated EPDs are more accurate. It's still a prediction, but it is the most information we've ever had on any yearling animals.

If you need any help understanding the information or want to spend more time looking at the bulls, please call or stop by anytime. Also, plan to attend our Field Day on Wednesday, January 28, 2019. Our featured speaker this year is Tyler Melroe, nutritionist from Hubbard Feeds.

▶▶ Join us for our annual ranch field day!

Tyler Melroe

Featured Speaker: Tyler Melroe,
Nutritionist with Hubbard Feeds

Lunch at 11:00 am
Speaker at 12:00 pm
Spend the afternoon looking at cattle.

ANNOUNCEMENTS

Announcements made sale day, and from the auction block during the sale, take precedence over printed material associated with this sale. Anyone attending this sale attends at their own risk. Breeders or any of the sale staff will not be held responsible for any personal injury while attending this sale.

AIRPORT

Devils Lake Regional Airport (DVL) is served by United to Denver and has excellent facilities for light aircraft.

Leeds (D31), Maddock (6D3) and Rugby (KRUG) have airports for light aircraft. Check runway conditions before landing.

EPDS

BOLT EPDs pulled BOLT EPDs pulled 1/8/19. All bulls are being GGP-LD tested so the results will be incorporated in to their EPDs by sale day and will be parent verified.

HERD HEALTH & DATA TEAM

Herd Veterinarian, Dr. Judy Gibbens, Gibbens Vet Service, Cando, ND

Pregnancy Ultrasound, Dr. JJ Hoyde, High Plains Vet Service, Sydney, MT

Carcass Ultrasound, Jason McLennan, Inc., St. Onge, SD

PERFORMANCE DATA

Complete ultrasound data will be available before the sale by logging on to www.kennersimmental.com. Data will also be available on sale day.

VIDEOS

Videos of the bulls will be available on our website in the middle of January.

Log on to www.kennersimmental.com.

SALE FORMAT

The cattle will sell by video on sale day. All the bulls and heifers will be penned next to the sale barn by 9 am on sale day and will stay in those pens throughout the sale.

TRUCKING

We will try to deliver the bulls to the buyer's farm, or we will assist buyers in coordinating loads and make the most economical trucking arrangements possible. All the bred heifers must be picked up on sale day or have trucking arrangements made soon after since they will be close to calving. For assistance with trucking arrangements, contact Erika.

INSURANCE

We can keep the bulls at home for no charge until April 1, but we recommend purchasing insurance.

For more information contact: Erika Kenner, 406-581-1188

TERMS & CONDITIONS

- We guarantee all bulls to be breeders and we reserve the right to test any bull in question as a non-breeder for at least 180 days before making an adjustment. And, if the bull is declared a sound breeder by a competent veterinarian, he will be returned to the buyer, at buyer's expense. In case an adjustment is required, it will be made with a replacement of equal value to animal in question, credit on purchase of another animal, or return of purchase price.
- Each animal becomes property and therefore is also the risk of the purchaser after it is sold. We guarantee the cattle to be healthy sale day.
- For those who cannot attend the sale, we will honor a telephone order and guarantee your phone purchase to meet your request when inspected personally by you.
- Certificates of registry will be supplied by the seller.
- All cattle sell under terms and conditions of the American Simmental Association and will be available in the office on sale day by request.
- We reserve the right to collect 100 units of semen on any bull in the sale for in-herd use only. The collection would be at our expense and buyer's convenience. Each bull will sell to the buyer with 100% ownership opportunity.

Can't make it? Watch and bid online through DVAuction.

Log on to www.dvauction.com and register for the sale. You must be approved prior to the sale, so please register early.

KENNER SIMMENTAL RANCH

Understanding the Data

WHY USE EPDS?

We have included all the data we can for each animal in this catalog, but we strongly recommend using the EPDs the most. EPDs allow a buyer to compare the animals across the breed. If you look at the actual data of an animal, it only tells you how they compare in that particular herd. By using the EPDs, you can compare them across herds and within herds more accurately.

We've formatted our lot boxes to include the percentile ranking for each trait if they rank within the top 50% of the breed. This will make it easier to evaluate each animal.

CALVING EASE EPD

Please understand the CE EPD is actually **heifer** calving ease. This number tells you how those bulls will calve on heifers - % unassisted compared to the other bulls on heifers. For example: If Bull A has a CE EPD of 10 and Bull B has a CE EPD of 5, Bull A will have 5% more unassisted births than Bull B when used on heifers. If you are going to use the bull for cows, you do not need to have that number as high.

GENOMIC EPDS

There are several genomic tests available. With a genomic test, the animal is also parent verified. The HD test (150K SNPs) is required for AI sires and donor cows, but the LD test (30K SNPs) is accurate in all other situations. All the tests will be incorporated in to the EPDs through the single-step system (BOLT) which is more accurate than in the past and will improve the accuracy of all tested animals.

We are testing all the bulls in this offering with an LD test and the EPDs will be updated prior to sale day. If a bull will be used in an AI program, he will need to be HD tested after the sale.

DILUTION GENE (DL)

We are testing all the red bulls for the dilution gene and will have all results by sale day. DLF means they do not carry the dilution gene, so grey calves will not result from any of these animals when bred to black cows.

OH/RC GENETIC TRAITS

OH or Oculocutaneous Hypopigmentation is a cosmetic genetic trait affecting Simmental cattle. It is a recessive trait so it is only possible from the mating of two carriers. It is non-lethal and doesn't affect performance of the animal, but the animals will have "white-colored" eyes and/or a diluted hair coat. The most popular recent ancestor that is the carrier is PVF-BF BF26 Black Joker. We have tested everything in our herd that could possibly be a carrier and have identified the ones in this sale as either **OHF (Free)** or **OHC (Carrier)**.

OHC means that animal carries the gene. If mated with other carriers, there is a possibility to see the trait. If not mated to carriers, you will not see the trait, but may pass the carrier gene to some of the progeny.

RC is the Red Charlie gene. This gene is responsible for passing along the red gene even though an animal would test homozygous black. The test results are masked and have to be tested further if a potential carrier. If the animal results as homozygous black, but a RC carrier, then they are actually heterozygous black. We have tested any bulls that could be potential carriers and have identified them in the catalog. You'll see **RCc for carrier** or **RCF for free**.

HERD HEALTH

All the bulls in the sale have had calfhood vaccinations of Inforce 3 & Endovac at birth. Spring shots were 7-way and Bovishield Gold One Shot. Pre-weaning shots were Bovishield Gold-One Shot & 7-way Somnus. At weaning, they were boosted with Bovishield Gold-One Shot and Somnus and wormed with Valbazen.

The bred heifers were vaccinated with Bovishield Gold VL5 HB & boosted with Bovishield Gold VL5 HB prior to breeding. In November, they were given Scour Bos 9 and Type A Clostridia and will be boosted with Scour Bos 4 & Type A Clostridia prior to the sale. They were wormed with Safeguard in December.

All the sale cattle were poured with Clean Up II the first week in January.

The bulls were fed a TMR ration formulated by Tyler Melroe of Hubbard Feeds. Our ration is formulated on a moderate level of energy that's appropriate for the genetic type and the northern environment just as our feeder cattle are fed. Our trace mineral program is designed to improve structural integrity, foot quality and immune function. They are on a high-end supplement program. Our average ADG for the 2019 sale bulls was 4.1 on a 107-day test.

BVD AND JOHNE'S STATUS

All animals in the herd were tested for BVD and tested negative. We also test for Johne's each year during preg check and have completed 8 years of testing. We remain at a Level 3 status.

Can't make the sale? Watch & bid online for **FREE** at www.dvauction.com !

DVAuction
Broadcasting Real-Time Auctions

Buying online is as easy as 1, 2, 3...

1. Create an account at www.dvauction.com under the "register" tab
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction-a DV representative will notify you once you have been approved
3. Tune in for the sale and make your purchases!

After the sale, contact the sale manager or owner to arrange transportation and payment. **High speed internet** is required for successful bidding-be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy Bidding-if you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

Having troubles?

During the auction, you can type a message to the operator at any time for assistance. Our full-time support team can also always be reached at (402) 474-5557.

Black Purebred Bulls

BLACK PUREBRED BULLS

DOUBLE J X011

DOUBLE J X011

Homozygous Black / Homozygous Polled

X011 put a bull in the sale every time she had one and had a couple daughters in the herd doing well, so we decided to add her to the donor pen. She flushed so well, freezing over 30 embryos each IVF mating, which allowed us to split matings giving us several sire groups. She clicked with every one of the matings. We also have an awesome set of heifer-mates in the replacement pen. X011 stamps her calves with so much length, depth and muscle shape and gives them an unbelievable disposition. They are so easy to be around and to admire. Take your pick between the Bozeman's, Cowboy Cut's, and Blueprint's in the Purebred section and the Impressive's and Benfield Substance in the SimAngus section.

BCLR DUAL RANGE D21-1

Heterozygous Black / Homozygous Polled

Dual Range was our pick of the Bichler sale in 2017. He's a Wide Range son out of the W21 cow Bichler's purchased from Wilkinson Farms that is doing very well in his ET program. Dual Range is a full brother to BCLR Wide Load in the Genex program. This is our first calf crop and we are excited to introduce his progeny in our sale. The calves perform very well without any calving difficulties on cows, in fact they are our heaviest gaining sire group. Since he's heterozygous black, you'll find one son in the red section – Lot 119.

GW BLUE COLLAR 399D

GW BLUE COLLAR 399D

Homozygous Black / Homozygous Polled
3/4 SM 1/4 AN

We purchased Blue Collar at the 2017 Gateway Simmentals bull sale in Lewistown, MT. We needed another homozygous black heifer bull and he has definitely earned that title. The calves were small at birth and came easy. We didn't know if they'd grow, but we are satisfied with how they've done. There are many bred heifers in this sale bred to him too. The calves have muscle shape for a calving ease pedigree and are attractive. Great EPDs and the calves have good dispositions.

BLACK PUREBRED BULLS

HOOK'S BOZEMAN 8B

HOOK'S BOZEMAN 8B

Homozygous Black / Homozygous Polled

We used Bozeman in our ET program and mainly on heifers. You'll find Bozeman sons by the X011 cow in the Purebred section and the W82 cow in the SimAngus section plus a few natural calves. They are moderate framed with a ton of thickness, muscle shape and length. He works well on heifers and you'll find a few sale heifers bred to him in this sale.

Black Purebred Bulls

NLC PROGRESSIVE 40C

NLC PROGRESSIVE 40C

Homozygous Black / Homozygous Polled

We only had 1 bull in the sale by Progressive last year because we only had 1 born – the rest were heifers! There are a few more this year and he was heavily used in the pasture this summer again. We purchased him from Nelson Livestock in Wibaux, MT in 2016 because he was unique - homozygous black, Purebred heifer bull with no Shear Force and yet he has growth and carcass value. We have had good luck with him on heifers and cows. They calve easy and still have performance, adequate frame, eye appeal and balanced EPDs.

RBS BOISE B63

RBS BOISE B63

Homozygous Black / Homozygous Polled

Boise was raised by Ruffy Brook Simmentals in Minnesota and sold in the Rydeen Farms sale in 2016 to Begger's Diamond V Ranch of Wibaux, MT. He is an Ishee Catalyst son, which makes the pedigree a little different for our herd. This is our second calf crop by him and we used him on heifers because he calved so well the year before. The calves have a lot of rib and depth of body. You'll find PB and 3/4 Boise progeny in Lots 36 – 47.

KS WANDY W82

Homozygous Black / Homozygous Polled 1/2 SimAngus

W82 is a Kayla daughter by BC Matrix who has been in the donor pen now for a couple years. Anytime Kayla is in the pedigree it proves to be a good thing. The females in our herd by her are so influential. Take your pick of several matings by W82 - Monte, Bozeman and Boise (Lots 47 - 49). She clicked with all of them!

KENNER SIMMENTAL RANCH

Black SimAngus Bulls

KS RIANA R257

Homozygous Black / Homozygous Polled

Riana was a cow that got overlooked for a lot of years. She had 6 bull calves naturally and all six made the sale and her natural daughters stayed in the herd. We finally put her in the donor pen at 11 years of age. We flushed her to Angus bulls to make more SimAngus and chose Identity, Capitalist and Impressive. She worked with all of them. She is a power cow, so we used calving ease Angus bulls. Use her calves on cows to add performance without adding too much birthweight.

HA COWBOY UP 5405

HA COWBOY UP 5405

PB Angus

Cowboy Up sold at the Hinman Angus sale in 2016 for \$350,000. We decided to try him last year and we are so glad we did! You can pick them out in the pen as they are all stamped with the same look – thick topped, deep bodied, and an attractive profile. They have performed well all the way from birth to yearling. We are super impressed with this sire group.

S POWERPOINT WS 5503

S POWERPOINT WS 5503

PB Angus

Powerpoint was raised by Spickler Angus Ranch of Glenfield, ND and sold to Ellingson Angus & ST Genetics. We used him on Purebred heifers to make SimAngus and they definitely calved easy. There are two 1/2 SimAngus bulls in the sale by him and they are both super calves.

KS HOME RUN B23

1/2 SimAngus

Home Run is a calving ease deluxe! He needs to be used in large heifer projects as he calves like a dream! We've used him on heifers and on heavy-birth weight cows. He stamps his calves with a very stylish profile that will catch your eye. Most are more moderate framed with great thickness. Dispositions are excellent and the females are wonderful!

CDI AMBITION 255C

Non-diluted Red / Homozygous Polled

Ambition was the high-selling (\$47,500) bull at the C Diamond Ranch Sale in 2016, going to Doug Bichler. He was also our pick of the sale, so we were able to buy in to the bull through a semen package. He is one of the most impressive bulls we have seen! Ambition is a power bull extraordinaire. There are some natural calves in the sale this year and some by two of our donors, X395 and B33.

KS BRIDGEWATER D196

Non-diluted Red / Homozygous Polled
3/4 SM 1/8 AN 1/8 AR

Bridgewater is a Commotion son that ended up as a power bull. He was one of the high-selling bulls in 2017 to Ben Stroth of Tappen, ND and his calves are hard to miss. They are long and stout and some of the most incredibly tame bulls to work with. We tried many times to picture some of them, but they really do not care and won't get excited about anything. Use the Bridgewater calves on cows to add performance, length and docility.

KS ROBIN HOOD C390

AS A YEARLING

KS ROBIN HOOD C390

Non-diluted Red / Homozygous Polled

Robin Hood was the high-selling red bull in our 2016 sale to Ben Stroth of Tappen, ND. We weren't able to AI to him the first year, but Stroth's really liked the calves so we used him last year. If you want to add frame, length, depth of body and tons of performance, look at his sons. They are also super gentle and many are dark, cherry red. Their pictures don't do them justice as they were too docile, but you'll be very impressed with them in person. Semen is available on KS Robin Hood through Stroth's.

Red Purebred Bulls

RFS DAYTONA D73

RFS DAYTONA D73

Non-diluted Red / Homozygous Polled

We purchased Daytona from Rydeen Farms in Minnesota in 2017 to be a Purebred performance red bull. This is our first calf crop and the calves calved well on cows and have grown. We used him heavily again this last year and in our ET program, but unfortunately, he got fighting with the bulls this winter and is no longer with us.

Commotion shouldn't be a stranger to you if you've followed our program. He has exceeded his calving ease expectations and also excels for growth! We've used him consistently on heifers the past 3 years and he does very well for us! Besides sons & daughters of him in this sale, we also have progeny by two of his sons, KS Bridgewater and KS Newton. Bridgewater sold to Ben Stroh of Tappen and Newton sold to Dan Birkeland and we used semen from both of them.

5/8 SM 1/4 AR 1/8 AN

Newton was one of the Commotion sons that sold in our 2017 sale to Dan Birkeland from Sheyenne, ND and we collected semen to use in our own herd. He worked well on our heifers and they've still grown and performed well. We have been super happy with the Commotion line and what they do. Newton adds a little more calving ease than Commotion and the docility is super!

KS DALUCA D745

Non-diluted Red / Homozygous Polled
5/8 SM 1/4 AN 1/8 AR

DalUCA sold in our 2017 sale to Pete Moe of Lewistown, MT for \$7,500. We were able to use him for the first year and then he went to Montana. We were always impressed with DalUCA's power and phenotype. His calves are dark, cherry red and they calved well on cows. All of his earlier born calves were heifers, so there are only a few bulls in the sale. DalUCA sons are Lots 116-118 in the reds & Lot 54 in the black SimAngus section.

KENNER SIMMENTAL RANCH

Bull Buyer's Quick Guide to ASA EPDs and \$ Indexes

Expected Progeny Differences (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing in what units they are expressed. For example, if the above case referred to weaning weight EPDs, sire A would be expected to sire 15 pounds more weaning weight than sire B. If calving ease was the trait, sire A would be expected to sire 15 percent more unassisted births in first-calf heifers; in other words, if sire B sired 30 assists in a group of 100 heifers, we would expect sire A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit www.simmental.org. Listed below are the units in which ASA EPDs are expressed:

All-Purpose Index (API): Dollars per cow exposed under an all-purpose-sire scenario. (See \$ Indexes for more details.)

Back Fat (BF): Inches of carcass backfat at 475 days.

Birth Weight (BW): Pounds of birth weight.

Calving Ease (CE): Percent of unassisted births when used on heifers.

Carcass Weight (CW): Pounds of carcass weight at 475 days.

Docility (DOC): Percent of offspring receiving a disposition score of 1 (docile).

\$ Indexes: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide pieces of the economic puzzle. This is where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on integrated commercial production. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

All-Purpose Index (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

Terminal Index (TI): Evaluates sires for use on mature Angus cows with all offspring put on feed and sold grade and yield.

Using API and TI: First, determine which index to use; if you are keeping replacements use API, if not, use TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years (\$50 diff. x 30 hd. x 4 yr. = \$6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit: www.simmental.org

Important disclaimer: DO NOT compare index values of purebreds of different breeds, hybrids of different breed composition or purebreds with hybrids — our system was not developed to make valid comparison among these groups. Therefore, you must first determine the breed and breed composition appropriate for your herd and use index values to compare animals within that population.
